PREFACE

This Arahan Teknik (Jalan) 2E/87 - "Guide Sign Design And Application" - is an addition to the Arahan Teknik (Jalan) 2/85 series on "Manual On Traffic Control Devices" which was published in 1986. It is to be used for the design and application of guide signs. Nevertheless there are parts of this Arahan Teknik which not only include, but add information on standard traffic signs i.e. regulatory, warning and temporary signs. Since this Arahan Teknik (Jalan) 2E/87 has in parts superseded Arahan Teknik (Jalan) 2A/85 and Arahan Teknik (Jalan) 2B/85, it must therefore be read or used in conjunction with them. Attached within is also a summary of addendums and amendments to both the Arahan Tekniks mentioned.

It must be noted that the sign design and application standards indicated in this Arahan Teknik and those others in series 2/85 are to be followed at all times.

This Arahan Teknik (Jalan) 2E/87 will be updated from time to time and in this respect any feedback from users will be most welcome. Any comments should be sent to Cawangan Jalan, Ibu Pejabat JKR, Kuala Lumpur.
